

Call for STEM Faculty Members

Bring Futures Literacy into Your STEM Classroom

How can we prepare STEM students to navigate uncertainty, imagine alternative futures, and develop responsible innovations?

As part of the **TEF-UI project**¹, we invite STEM faculty members to join a **Futures Literacy Train-the-Trainer Programme** and explore practical methods for integrating futures thinking into their teaching.

What can you expect?

- **Practical training** in Futures Literacy and futures-thinking methods (4 to 5 training sessions online)
- **Ready-to-adapt teaching materials** for integration into existing STEM courses
- **Exchange with fellow educators** from different STEM disciplines and institutions
- **Professional development certification** from the UNESCO Chair in Futures Capability for Innovation and Entrepreneurship

What would be your role:

- Pioneering the integration of Futures Literacy into your existing courses
- Co-creating Futures Literacy formats for STEM Teaching
- Be a multiplier for innovative teaching methods!

Who can participate?

STEM faculty members interested in innovative teaching approaches. **No prior experience with Futures Literacy is required.**

Interested?

Express your interest by contacting
